EDUCATION

University College of Engineering and Technology

B.Tech in CSE, CGPA: 8

Bikaner, RAJ

2020 – present

BSN Academy

Senior Secondary (XIIth), Percentage: 82%

Kota, RAJ

2019 – 2020

PROJECTS

College Timetable Generation and Management App | *MERN, Material-UI*

[hosted project](#)

- Created a web application to automate college timetable scheduling, enhancing efficiency and minimizing manual errors.
- Used **Node.js** with **Express** for backend API, MongoDB for database management, and **React.js** with **React Router**, **Redux**, and **Material-UI** for frontend components.
- Enables admins to manage rules, subjects, and teacher assignments, while allowing teachers to submit class and lab requirements. Automatically generates timetables, detects conflicts, and provides accessible schedules for students and teachers.

AnonPad | *Node+Express, MongoDB, React.js, React-Router, Tailwind*

[hosted project](#)

- Full Stack WebApp for notes management with language conversion, word counting, speech-to-text, and task management features.
- Created a React frontend with Router and Redux for efficient state management, supported by a Node.js and Express.js backend integrating seamlessly with MongoDB.
- Implemented secure user authentication and personalized note management, alongside a responsive UI using React components, Tailwind CSS, ensuring compatibility across devices.

Anon's Shelf | *React.js, React-Router, Firebase*

[hosted project](#)

- Dynamic WebApp that offers users a platform to discover, explore and organize all of their favorite Movies and TV shows in watchlist.
- React-based web application with Firebase integration for authentication, authorization, and personalized database management.
- Enhanced UX with visually appealing responsive design and interactive features like search bar, content filters, trailers & category-specific navigation

Dashboard UI | *React.js, Chart.js, OAuth 2.0*

[hosted project](#)

- Elegantly designed, fully responsive Dashboard UI protected by login page with Google Login feature.
- Dynamic Charts offering a modern, data-rich environment for intuitive data analysis and exploration.

Other Projects

[visit Github](#)

- Classic Game of Tenzies, Movie Quote Generator, Rock-Paper-Scissors, Space Tour Website, URL-shortener, Blog Website Front page, Tip-Calculator and more.

TECHNICAL SKILLS

Languages: Java, JavaScript, HTML/CSS

Frameworks/Libraries: React, Node.js, Express, React-Router, Redux, Material-UI, Tailwind

Developer Tools: Git, Google Cloud Platform, VS code, NPM

Multimedia Editors : Adobe Photoshop and Premiere Pro

Interests/Hobbies : Movies, Shows, Music, Podcasts and Exploring Niche Content Across the internet
